PROJECTS

CRUD Operation Using React JS

[View in GitHub](#)

- In ReactJS, develop a component-based architecture to organize UI elements. Utilize state management to store and update data, enabling create, read, update, and delete operations.
- Implement forms for data input, display components for viewing data, and event handlers for user interactions, ensuring a seamless CRUD experience within a straightforward user interface.

Merchant Product Management System

[View in GitHub](#)

- Developed a Merchant Product Management System using Hibernate and MySQL for database management.
- The system facilitates adding, deleting, editing, and viewing product data.
- Leveraging Hibernate for object-relational mapping, it ensures efficient data manipulation while providing a user-friendly interface for seamless product management.

E-Commerce Application - present

[View in GitHub](#)

- TheDeveloped an E-Commerce Application utilizing ReactJS for the frontend and Spring Boot with JPA for the backend, leveraging MySQL for database management.
- Seamlessly integrated modern UI features with robust backend functionality, enabling users to browse, purchase, and manage products effectively.

INTERNSHIP

Frontend Intern

May 2024 – Aug 2024

Salesqueen Software Solutions | Tamil Nadu, India

- During my ongoing internship at SalesQueen Software Solutions in Chennai, I'm actively engaged in frontend development tasks, specializing in HTML, CSS, JavaScript, and Bootstrap.
- Collaborating on website projects, I contribute to crafting visually appealing and user-friendly interfaces. Implementing responsive designs and enhancing website functionality are among my key responsibilities.
- This internship opportunity continues to provide me with valuable hands-on experience in the dynamic field of frontend development, further nurturing my passion for creating engaging digital experiences.
